Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows, resulting in timely decision-making and efficient case resolution. • Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, leading to improved case accuracy and reduced repeat-issue investigation time. • Analyzed 200+ weekly cases to identify recurring fraud patterns, flagged them early, and reduced repeat-issue investigation time before escalation, demonstrating proactive risk mitigation. • Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case records, ensuring transparent and accountable case management and decision-making processes.	

Projects

Phishing and OSINT Threat Intelligence Tool	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Developed multi-API threat intelligence pipeline using Python, submitting suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io for analysis, and cross-referencing WHOIS registration age, DNS records, and SSL details for phishing analysis. • Implemented typosquatting (brand impersonation detection) domain detector generating character-substitution variants of brand domains using Python, and checking live DNS resolution for brand-impersonation analysis. • Deployed Telegram bot interface using Python and Telegram bot, enabling analysts to submit URLs for live IOC enrichment (threat intelligence), supporting bulk CSV input/output for incident response workflows, and including OSINT enrichment (open-source intelligence) via theHarvester for domain profiling.	
Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Built automated vulnerability assessment pipeline using Python, integrating Nessus and OpenVAS REST APIs, and generating CVE reports classified by CVSS severity (vulnerability prioritisation) and EPSS context from the FIRST.org API. • Developed OWASP Top 10 (web application security) automated web checker using Python, sending crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities, and documented SQL injection exploit and parameterised query remediation. • Automated scan scheduling using Bash and cron, and built delta-scan logic to flag newly discovered CVEs and organize patch compliance (remediation tracking) tracking evidence.	

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
