Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, maintaining a 98% on-time escalation rate
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing 30+ actionable escalation reports per week
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions for each of the 50+ weekly cases, creating a centralized case log used in quarterly audits
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation, reducing duplicate investigations by 15%

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Implemented a security triage workflow that ingests Nessus and OpenVAS REST data in Python, applies severity-based prioritization and structured escalation logic, and generates a CVE report with CVSS severity and EPSS context from the FIRST.org API.
- Created a pattern detection module using Python to send crafted HTTP requests against web applications, recognize OWASP Top 10 injection patterns, and document a SQL injection exploit with a parameterised query remediation guide.
- Automated audit documentation by scheduling Bash-driven scans via cron, comparing delta results to flag new CVEs, and producing patch compliance tracking evidence for each finding.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Developed a security triage pipeline in Splunk that runs SPL correlation searches for brute-force, lateral movement and privilege escalation, maps detected TTPs to MITRE ATT&CK, and creates a PICERL incident report as audit documentation.
- Engineered a pattern detection script in Python that consumes Splunk alerts, enriches IOCs via VirusTotal API, and logs enriched findings with severity classification for downstream analysis.
- Converted detection logic to vendor-neutral Sigma rules, performed TCP/IP pattern recognition in Wireshark for SYN scans, DNS tunnelling and plaintext credential exposure, and stored the resulting rule set as audit documentation.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
