Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for further action.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable knowledge base for future security reviews.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK producing a PICERL incident report.
- Built automated SOAR style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor neutral use and performed TCP IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure resulting in a Wireshark analysis report.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi API threat intelligence pipeline: submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross references WHOIS registration age, DNS records and SSL details for phishing analysis producing a phishing analysis report.
- Implemented typosquatting domain detector generating character substitution variants of brand domains and checking live DNS resolution for brand impersonation analysis delivering a typosquatting detection list.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment and supports bulk CSV input output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling via the Telegram bot interface.
