Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage, escalation, and decision workflows, producing a consistent case triage workflow.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating a detailed escalation report.
- Documented audit-ready case records capturing investigation findings, decisions, evidence notes, and corrective actions, resulting in a comprehensive audit log.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK and produced a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches IOCs using MITRE ATT&CK knowledge base, and generates severity-classified tickets for analyst review.
- Translated detection logic into Sigma rules for vendor-neutral deployment and used Wireshark packet captures to identify SYN scans, DNS tunnelling and plaintext credential leakage.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal and AbuseIPDB, then cross-references WHOIS registration age, DNS records and SSL details to produce phishing analysis reports.
- Implemented Python typosquatting detector that generates character-substitution variants of target brands and checks live DNS resolution to identify impersonating domains.
- Built Telegram bot in Python allowing analysts to submit URLs, which triggers VirusTotal and AbuseIPDB lookups and returns enriched IOC data in CSV format for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
