Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage workflow; produced daily case triage report.
- Investigated seller claims to uncover root causes, identified policy violations and anomalous patterns, and escalated findings to senior reviewers; generated escalation summary for 50 cases.
- Maintained audit-ready documentation of investigation findings, evidence notes, and corrective actions for each case, ensuring a complete record for 50+ weekly submissions.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK framework and produced PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators using internal threat feeds, applies MITRE ATT&CK mapping and generates severity-classified notifications.
- Translated existing detection logic into Sigma rules for vendor-neutral deployment, and conducted TCP/IP packet analysis with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, then cross-references WHOIS registration data, DNS records and SSL certificate details for phishing analysis.
- Implemented Python typosquatting detector that generates character-substitution variants of brand domains, queries live DNS resolution and WHOIS records to identify potential brand-impersonation.
- Built Telegram bot in Python allowing analysts to submit URLs, which triggers bulk IOC enrichment via VirusTotal and AbuseIPDB and returns WHOIS and DNS summary for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
