Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage, escalation, and decision workflows, producing a daily case triage report
- Conducted root cause analysis on seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers in an escalation packet
- Maintained audit-ready case documentation capturing investigation findings, decisions, evidence notes, and corrective actions, creating a comprehensive audit log
- Spotted recurring fraud patterns across 200+ weekly cases, flagged them early to cut repeat-issue investigation time before escalation, generating an early warning alert

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK in a PICERL incident report.
- Created a Python pipeline that ingests Splunk alerts, enriches them with Nmap scan data and sends Telegram notifications with severity classification.
- Converted detection logic to Wireshark packet analysis for SYN scans, DNS tunnelling and plaintext credential exposure and documented findings in a TCP/IP analysis report.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated assessment pipeline that calls Nessus and OpenVAS REST APIs from Python and generates CVE reports with CVSS severity and EPSS context.
- Developed a Python script that sends crafted HTTP requests to test for injection, broken authentication and SSRF vulnerabilities and produces a remediation guide for identified issues.
- Implemented Bash and cron based scan scheduling with delta-scan logic to flag new CVEs and produce patch compliance tracking evidence.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
