Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflows; outputted daily triage summary report
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers; produced weekly escalation brief
- Maintained audit-ready case documentation capturing investigation findings, evidence notes, and corrective actions; generated compliant case log archive
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK and wrote PICERL incident report.
- Built automated detection pipeline: Python script ingests Splunk alerts, enriches data with Nmap scans and Wireshark packet captures, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure detection.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline: submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io, cross-references WHOIS registration age, DNS records and SSL details for phishing analysis report.
- Implemented typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflow and includes OSINT enrichment via theHarvester for domain profiling.
