## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent case routing.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for resolution.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, supporting compliance reviews.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK and generated a PICERL incident report.
- Created a Python automation that consumes Splunk alerts, enriches IOCs using internal feeds, applies MITRE ATT&CK mapping and logs severity classification to a CSV file.
- Translated detection logic into Sigma rules for vendor-neutral deployment and conducted Wireshark TCP/IP analysis to identify SYN scans, DNS tunnelling and plaintext credential exposure, producing an analysis report.

**Phishing and OSINT Threat Intelligence Tool** | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed a Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, then cross-references WHOIS registration data, DNS records and SSL details for phishing analysis.
- Implemented a Python typosquatting detector that generates character-substitution variants of brand domains and queries live DNS resolution via WHOIS lookups for brand-impersonation analysis.
- Built a Telegram bot in Python allowing analysts to submit URLs for live IOC enrichment, processing bulk CSV inputs, querying VirusTotal and AbuseIPDB and returning WHOIS details to the response channel.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
