Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, resulting in consistent case routing metric.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing an escalation summary report.
- Documented audit-ready case records with investigation findings, decisions, evidence notes, and corrective actions, achieving compliance readiness checklist.
- Detected recurring fraud patterns across 200+ weekly cases, flagged early to reduce repeat-issue investigation time before escalation, delivering pattern alert count.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and produced a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators using MITRE ATT&CK knowledge base and logs severity classification to a structured output file.
- Translated detection logic into reusable Python modules and documented network scan patterns using Wireshark captures of SYN scans, DNS tunnelling and plaintext credential exposure, resulting in Wireshark capture documentation.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python and generated EPSS-enhanced CVE reports using CVSS severity and NVD API data.
- Developed Python-based OWASP Top 10 web checker that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and produced SQL injection exploit documentation.
- Automated scan scheduling with Bash and cron, implemented delta-scan logic to flag newly discovered CVEs and compiled patch compliance evidence package.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
