Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 - 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 - 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 - 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	Jun. 2024 - Jan. 2026 Bengaluru, India
---	---

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows, resulting in timely decision-making and reduced repeat-issue investigation time.
- Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, ensuring risk prioritization and compliance tracking.
- Analyzed 200+ weekly cases, spotting recurring fraud patterns and flagging them early, which reduced repeat-issue investigation time before escalation.
- Documented audit-ready case notes, recording investigation findings, decisions, evidence notes, and corrective actions, providing control evidence and decision trails for review.

Projects

Phishing and OSINT Threat Intelligence Tool <i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Developed multi-API threat intelligence pipeline using Python, submitting suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io, and cross-referencing WHOIS registration age, DNS records, and SSL details for phishing analysis. • Implemented typosquatting (brand impersonation detection) domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis using Python, AbuseIPDB, and WHOIS. • Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment (threat intelligence) using Python, Telegram bot, and theHarvester for domain profiling.
Vulnerability Scanner and Patch Prioritization Engine <i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python, generating CVE reports classified by CVSS severity (vulnerability prioritisation) and EPSS context from the FIRST.org API. • Developed OWASP Top 10 (web application security) automated web checker using Python, sending crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities, and documenting SQL injection exploit and parameterised query remediation. • Automated scan scheduling using Bash and cron, and built delta-scan logic to flag newly discovered CVEs and organize patch compliance (remediation tracking) tracking evidence using Nessus and OpenVAS.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation, management

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
