Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing consistent case routing metric.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating actionable escalation reports.
- Documented audit-ready case records with investigation findings, decisions, evidence notes, and corrective actions, delivering a compliant documentation repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis, producing enriched IOC reports.
- Implemented typosquatting detector that generates character-substitution variants of brand domains and checks live DNS resolution for brand-impersonation analysis, delivering a list of flagged domains.
- Deployed Telegram bot interface that accepts URL submissions and bulk CSV input, enriches each indicator with OSINT from theHarvester and returns detailed profiling data to analysts, creating real-time enrichment messages.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline that integrates Nessus and OpenVAS REST APIs in Python and enriches CVE findings with CVSS severity and EPSS context from the FIRST.org API, generating comprehensive vulnerability reports.
- Developed OWASP Top 10 web checker that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and documents SQL injection exploit details with parameterised query remediation guidance, producing a security assessment checklist.
- Automated scan scheduling using Bash and cron and added delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence, creating incremental scan change logs.
