## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security escalation.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable threat documentation repository.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation, establishing a pattern-detection alert process.

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with correlation searches for brute force, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and produced a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches IOCs using MITRE ATT&CK knowledge base and generates severity-classified tickets.
- Translated detection logic into vendor-neutral Sigma rules and used Wireshark packet captures to identify SYN scans, DNS tunnelling and plaintext credential leaks.

**Phishing and OSINT Threat Intelligence Tool** | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, enriches results with WHOIS registration data and delivers findings via Telegram bot.
- Implemented Python typosquatting detector that creates character-substitution variants of brand domains, performs live DNS resolution checks and logs impersonation candidates.
- Built Telegram bot in Python allowing analysts to submit URLs, triggers bulk VirusTotal and AbuseIPDB lookups from CSV input and returns enriched IOC reports.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
