Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, using structured triage and escalation workflow to support security management and audit readiness, maintaining 100% audit-ready status.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, delivering actionable security controls and producing a control-evidence pack.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, creating a compliant evidence trail for security management and enabling audit closure.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and documented MITRE ATT&CK mapping in a reference guide.
- Created a Python script that ingests Splunk alerts, enriches IOCs from an internal database, and dispatches Telegram notifications with severity classification and generated notification payload.
- Converted detection logic to Sigma rules for vendor neutral use and performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure and produced a Sigma rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a multi-API threat intelligence pipeline that submits suspicious URLs and IPs to VirusTotal API and AbuseIPDB, cross-references WHOIS registration data and DNS records for phishing analysis and outputs an enriched IOC report.
- Implemented a Python-based typosquatting detector that generates character-substitution variants of brand domains, checks live DNS resolution and flags impersonating domains in a list of flagged domains.
- Deployed a Telegram bot interface that allows analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflows and produces an enrichment output file.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
