Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying a structured triage workflow and escalating non-compliant cases to senior reviewers; resulted in steady triage queue throughput.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for remediation; produced a weekly violation report.
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, maintaining compliance logs for 50+ weekly cases; achieved high documentation completeness score.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation; increased pattern detection rate by 15%.

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python and generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API as remediation tracking evidence.
- Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth and SSRF vulnerabilities in Python and documented SQL injection exploit and parameterised query remediation as a detailed remediation report.
- Automated scan scheduling via Bash and cron and built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence as a consolidated patch status report.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation in Python and mapped TTPs to MITRE ATT&CK as a structured incident report.
- Built automated SOAR-style detection pipeline where a Python script ingests Splunk alerts, runs IOC enrichment via VirusTotal API and dispatches Telegram notifications with severity classification as a documented alert workflow.
- Converted detection logic to Sigma rules in a vendor-neutral format and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure as a set of Sigma rule files.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
