Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage, escalation, and decision workflows, achieving consistent case triage throughput.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing detailed escalation reports.
- Maintained audit-ready documentation of investigation findings, decisions, evidence notes, and corrective actions, creating a comprehensive audit log for compliance.
- Spotted recurring fraud patterns across 200+ weekly cases, flagged them early and reduced repeat-issue investigation time before escalation, generating timely pattern alerts.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK framework and generated a PICERL incident report.
- Created a Python script that ingests Splunk alerts, enriches them with MITRE ATT&CK context and assigns severity classification, then writes the enriched data to an audit log.
- Translated detection logic into Sigma rules for vendor-neutral use, performed TCP/IP analysis in Wireshark to identify SYN scans and DNS tunnelling, and documented the findings in a detection handbook.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a Python pipeline that submits suspicious URLs and IPs to VirusTotal API and AbuseIPDB, cross-references WHOIS registration data, and outputs a consolidated enrichment report.
- Implemented a typosquatting detector in Python that generates character-substitution variants of brand domains, checks live DNS resolution and logs potential impersonation entries in a detection list.
- Deployed a Telegram bot written in Python that accepts analyst-submitted URLs, performs bulk IOC enrichment via VirusTotal and WHOIS lookups, and presents the results in an enrichment dashboard.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
