Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, leveraging structured alert triage and escalation workflow used in Operations and Security roles in India. • Conducted root cause analysis on seller claims, identifying policy violations and anomalous patterns, and escalated findings to senior reviewers. • Maintained audit-ready case documentation, recording investigation findings, decisions, and corrective actions for Security incident reporting and IT audit in Bangalore. • Spotted recurring fraud patterns across 200+ weekly cases and flagged them early — cutting repeat-issue investigation time before escalation in Security and Operations roles.	

Projects

Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Developed automated vulnerability assessment pipeline in Python, integrating Nessus and OpenVAS REST APIs, and generating CVE reports with CVSS severity classification and EPSS scoring from FIRST.org API. • Developed OWASP Top 10 automated web checker to detect web vulnerabilities, including injection, broken auth, and SSRF, and documented SQL injection remediation. • Automated scan scheduling via Bash and cron; built delta-scan logic for CVE flagging and remediation SLA deadlines (Critical=24hrs, High=7 days, Medium=30 days).	
SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Deployed Splunk SIEM with SPL searches for brute-force detection, lateral movement, and privilege escalation (T1110, T1078, T1059); mapped TTPs and wrote incident report. • Developed SOAR-style pipeline: Python script ingests Splunk alerts, enriches with VirusTotal API, and dispatches Telegram notifications with severity classification, reducing mean time to triage by 50% (EPSS 8.5). • Converted detection logic to Sigma rules; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions, Security, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
