Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflows, producing a daily triage summary report
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers via an escalation packet
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a comprehensive case dossier
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK resulting in a PICERL incident report.
- Created a Python script that ingests Splunk alerts, enriches them with MITRE ATT&CK technique references and generates structured incident tickets.
- Converted detection logic to a set of Sigma rules and performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, producing a detection rule set.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline that integrates Nessus and OpenVAS REST APIs in Python and generates CVE reports classified by CVSS severity using data from the NVD API.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and documents findings in a vulnerability assessment report.
- Automated scan scheduling with Bash and cron, implemented delta-scan logic to flag newly discovered CVEs and organized patch compliance tracking evidence.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture
Automation: Python, Bash (basic), boto3, regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
