Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, routing high-risk claims to senior review within same-day SLA with no escalation omissions.
- Investigated seller claims for policy violations and anomalous patterns across 200+ weekly cases; documented root-cause findings with supporting evidence for senior reviewer sign-off.
- Maintained structured case records capturing investigation rationale, policy evidence, and corrective actions, producing audit-ready documentation for compliance review.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches to monitor IAM anomalies including unauthorized privilege escalation and suspicious cross-account access patterns; mapped cloud-relevant TTPs to MITRE ATT&CK and wrote PICERL incident report.
- Built automated cloud security detection pipeline: Python script ingests Splunk alerts for IAM policy violations, performs IOC enrichment via VirusTotal API, and dispatches Telegram notifications with severity classification.
- Developed Sigma-compatible detection rules for cloud-specific TTPs including credential abuse and lateral movement; performed network analysis in Wireshark to identify anomalous authentication and DNS traffic patterns in cloud environments.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API cyber threat intelligence pipeline: submits IOCs to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS registration data, DNS records, and SSL certificate details for intelligence products.
- Implemented typosquatting domain detector generating character-substitution variants of tracked infrastructure and checking live DNS resolution for infrastructure-based threat hunting.
- Deployed Telegram bot interface for real-time IOC enrichment enabling analysts to process indicators at scale; supports bulk CSV input/output for threat intelligence workflows and includes OSINT enrichment via theHarvester for comprehensive domain attribution.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture

Automation: Python, Bash (basic), boto3, regular expressions, active directory

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
