Education

Presidency College

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

2021 - 2023

St. Claret College

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

2018 - 2021

St. Claret PU College

Higher Secondary (12th) · Bengaluru, India

2016 - 2018

Work Experience

Support Operations Specialist

Amazon FBA

Jun. 2024 - Jan. 2026

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage discipline to prioritize high-risk cases.
- Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for timely decision-making.
- Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions
- Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation.

Projects

Risk Analyst at Commvault | risk identification, control gap analysis, escalation priorities, policy-based risk triage, Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot

- Created audit-ready case notes by building a multi-API threat intelligence pipeline that submits suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io, and cross-references WHOIS registration age, DNS records, and SSL details for risk identification and control gap analysis.
- Developed a typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis and risk identification.
- Deployed a Telegram bot interface enabling analysts to submit URLs for live IOC enrichment, supporting bulk CSV input/output for incident response workflows and including OSINT enrichment via theHarvester for domain profiling and risk prioritization.

Risk Analyst at Commvault | risk identification, control gap analysis, escalation priorities, policy-based risk triage, Python, Bash, Nessus, OpenVAS, NVD API

- Generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API by building an automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python for risk identification and control gap analysis.
- Documented SQL injection exploit and parameterised query remediation by developing an OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities for risk identification and escalation priorities.
- Automated scan scheduling via Bash and cron, and built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence for risk identification and policy-based risk triage.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
