Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing consistent case routing metric.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, delivering actionable escalation report.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, establishing a compliant documentation repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and produced a PICERL incident report.
- Developed a Python script that ingests Splunk alerts, enriches IOCs via VirusTotal API and sends Telegram notifications with severity classification, creating an automated detection pipeline.
- Translated detection logic into Sigma rules for vendor neutral SOC use and performed TCP IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, delivering a cross-platform detection package.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Created a Python pipeline that integrates Nessus and OpenVAS REST APIs, pulls CVE data from NVD API and adds EPSS context from FIRST.org, producing classified vulnerability reports.
- Implemented an OWASP Top 10 web checker in Python that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and documented a SQL injection exploit with parameterised query remediation, generating a comprehensive test suite.
- Automated vulnerability scan scheduling with Bash scripts and cron, added delta-scan logic to flag newly discovered CVEs and compiled patch compliance tracking evidence, delivering an ongoing compliance dataset.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
