Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enhancing management oversight.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, establishing a management-ready knowledge base.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation, improving management detection.

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that called Nessus and OpenVAS REST APIs, retrieved CVE data from the NVD API, applied CVSS severity scoring and EPSS context from the FIRST.org API, and produced a consolidated CVE report.
- Developed an OWASP Top 10 web checker in Python that sent crafted HTTP requests to identify injection, broken authentication, and SSRF flaws, captured a SQL injection exploit example, and documented a remediation guide.
- Automated scan scheduling with Bash scripts and cron, implemented delta-scan logic to flag newly discovered CVEs, and generated patch compliance tracking evidence for each scan cycle.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force attempts, lateral movement, and privilege escalation, mapped detected TTPs to MITRE ATT&CK, and authored a PICERL incident report.
- Built an automated detection pipeline in Python that ingested Splunk alerts, enriched IOCs via the VirusTotal API, classified severity, and dispatched Telegram notification messages.
- Converted detection logic to vendor-neutral Sigma rules, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling, and plaintext credential exposure, and delivered a comprehensive Sigma rule set.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
