Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security governance.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a reference repository for security audits.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with correlation searches for brute force, lateral movement and privilege escalation, mapped detected TTPs to MITRE ATT&CK framework and generated PICERL incident report.
- Built Python automation that consumes Splunk alerts, enriches IOCs using internal feeds and creates severity-classified tickets in the incident management system.
- Translated detection logic into Sigma rules for cross-platform use and conducted packet analysis with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential leaks.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits URLs and IPs to VirusTotal and AbuseIPDB, then cross-references WHOIS registration data, DNS records and SSL certificate details for phishing analysis.
- Developed Python typosquatting detector that generates character-substitution variants of target domains, performs live DNS resolution checks and logs potential brand-impersonation findings.
- Created Python-based Telegram bot that accepts analyst-submitted URLs, enriches IOCs in real time and returns results as CSV files for incident response workflows.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
