Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, supporting security incident intake
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for further action
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable security incident repository
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK framework and generated a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators using MITRE ATT&CK knowledge base and outputs severity-classified findings to a structured log file.
- Translated detection logic into Sigma rule format for cross-platform use and captured packet traces with Wireshark to identify SYN scans, DNS tunnelling and clear-text credential leakage, saving packet capture files.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, enriches results with WHOIS registration data and sends summaries via Telegram bot.
- Implemented Python typosquatting detector that creates character-substitution variants of brand domains, queries WHOIS records for each variant and logs potential impersonation entries.
- Built Telegram bot in Python allowing analysts to upload URLs or CSV lists, performs live IOC enrichment through VirusTotal API and AbuseIPDB, enriches with WHOIS data and returns results as downloadable CSV files.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
