## Education

|                                                                                                            |             |
|------------------------------------------------------------------------------------------------------------|-------------|
| <b>Presidency College</b><br><i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>   | 2021 – 2023 |
| <b>St. Claret College</b><br><i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i> | 2018 – 2021 |
| <b>St. Claret PU College</b><br><i>Higher Secondary (12th) · Bengaluru, India</i>                          | 2016 – 2018 |

## Work Experience

|                                                    |                                           |
|----------------------------------------------------|-------------------------------------------|
| <b>Support Operations Specialist</b><br>Amazon FBA | Jun. 2024 – Jan. 2026<br>Bengaluru, India |
|----------------------------------------------------|-------------------------------------------|

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, ensuring compliance with structured case triage, escalation, and decision workflows.
- Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for risk management.
- Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions for access control.
- Spotted recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation for security governance.

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| <b><u>SOC Automation and Threat Detection Lab</u></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <i>Python, Splunk, Wireshark, Nmap, MITRE ATT&amp;CK</i>      |
| <ul style="list-style-type: none"><li>• Deployed Splunk SIEM with SPL searches for brute-force, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&amp;CK (T1110, T1078, T1059) and wrote incident report.</li><li>• Built automated SOAR-style detection pipeline: ingesting Splunk alerts, enriching with VirusTotal API, and dispatching Telegram notifications with severity classification.</li><li>• Converted detection logic to Sigma rules; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.</li></ul> |                                                               |
| <b><u>Phishing and OSINT Threat Intelligence Tool</u></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i> |
| <ul style="list-style-type: none"><li>• Built multi-API threat intelligence pipeline: submits suspicious data to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS, DNS, and SSL details for unified phishing probability score.</li><li>• Developed typosquatting detector generating domain variants and checking live DNS resolution to catch brand-impersonation attacks.</li><li>• Deployed Telegram bot interface for live IOC enrichment, supporting bulk CSV input/output and OSINT enrichment via theHarvester for domain profiling.</li></ul>                     |                                                               |

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis  
**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark  
**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain  
**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture  
**Automation:** Python, Bash (basic), boto3, regular expressions, Access Control, Compliance, IAM Tools

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
