Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, supporting access governance and maintaining a 98% on-time decision rate
- Investigated root cause of seller claims, identified policy violations and anomalous patterns, escalated findings to senior reviewers, enabling timely remediation and achieving 15% faster issue resolution
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, ensuring compliance and traceability, producing 100% reviewable dossiers
- Detected recurring fraud patterns across 200+ weekly cases, flagged early to reduce repeat-issue investigation time before escalation, cutting repeat investigations by 20%

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK framework and produced a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators with MITRE ATT&CK technique lookup and triggers Nmap scans for host validation, outputting results to a structured log file.
- Translated existing detection logic into Sigma rule format for vendor-neutral deployment and conducted Wireshark packet captures to identify SYN scans, DNS tunnelling and plaintext credential exposure, delivering a Sigma rule set package.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, then enriches results with WHOIS registration data, and forwards the compiled intelligence to a Telegram bot for analyst review, producing a consolidated threat intelligence report.
- Implemented Python typosquatting detector that generates character-substitution variants of target domains, queries WHOIS for registration status and resolves DNS to confirm active impersonation, and logs findings to a Telegram bot feed, creating a typosquatting detection list.
- Built Telegram bot in Python that accepts analyst-submitted URLs, queries VirusTotal API and AbuseIPDB for IOC enrichment, processes bulk CSV inputs and outputs enriched results, and stores the output in a structured JSON file for incident response, delivering an enriched IOC dataset.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture

Automation: Python, Bash (basic), boto3, regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
