Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	Jun. 2024 – Jan. 2026 Bengaluru, India
---	---

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows, resulting in timely decision-making.
- Investigated root cause analysis on seller claims, identifying policy violations and anomalous patterns, and escalated findings to senior reviewers, leading to informed decision-making.
- Analyzed 200+ weekly cases to spot recurring fraud patterns, flagging them early to reduce repeat-issue investigation time before escalation, achieving efficient issue resolution.
- Documented audit-ready case records, capturing investigation findings, decisions, evidence notes, and corrective actions, ensuring transparent and compliant case management.

Projects

SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Deployed Splunk SIEM with SPL correlation (detection engineering) searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (TTP mapping) and wrote PICERL incident report. • Built automated SOAR (security orchestration and automation)-style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment (threat intelligence) via VirusTotal API, and dispatches Telegram notifications with severity classification. • Converted detection logic to Sigma rules (detection-as-code) (vendor-neutral format used by enterprise SOC's); performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.	
Phishing and OSINT Threat Intelligence Tool	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Built multi-API threat intelligence pipeline: submits suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS registration age, DNS records, and SSL details for phishing analysis. • Implemented typosquatting (brand impersonation detection) domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis. • Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment (threat intelligence); supports bulk CSV input/output for incident response workflows and includes OSINT enrichment (open-source intelligence) via theHarvester for domain profiling.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
