## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent case throughput.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for timely remediation.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, supporting compliance reviews.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Configured Splunk with correlation searches for brute-force, lateral movement, and privilege escalation; mapped detected TTPs to MITRE ATT&CK; produced incident report.
- Developed Python script that ingests Splunk alerts, enriches IOCs via VirusTotal API, and sends Telegram notifications with severity classification; generated real-time alert dashboard.
- Converted detection logic to Sigma rules; performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure; documented findings in threat report.

**Vulnerability Scanner and Patch Prioritization Engine** | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated pipeline integrating Nessus and OpenVAS REST APIs in Python; generated CVE reports classified by CVSS severity and EPSS context from FIRST.org API; archived reports in secure storage.
- Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation; stored findings in vulnerability database.
- Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence; updated compliance ledger.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
