## Education

|                                                                                                           |             |
|-----------------------------------------------------------------------------------------------------------|-------------|
| <b>Presidency College</b><br><i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>  | 2021 – 2023 |
| <b>St. Clare College</b><br><i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i> | 2018 – 2021 |
| <b>St. Clare PU College</b><br><i>Higher Secondary (12th) · Bengaluru, India</i>                          | 2016 – 2018 |

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| <b>Support Operations Specialist</b><br><i>Amazon FBA</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Jun. 2024 – Jan. 2026<br>Bengaluru, India |
| <ul style="list-style-type: none"><li>• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying triage discipline to prioritize high-risk cases for senior reviewer escalation.</li><li>• Investigated seller claims, identified policy violations and anomalous patterns through root cause analysis, and escalated findings to senior reviewers for timely decision-making.</li><li>• Maintained audit-ready case documentation, recording investigation findings, decisions, evidence notes, and corrective actions</li><li>• Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.</li></ul> |                                           |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Risk Analyst</b>   <i>risk, risk identification, risk prioritization, Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <ul style="list-style-type: none"><li>• Developed multi-API threat intelligence pipeline: submits suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS registration age, DNS records, and SSL details for risk identification and analysis.</li><li>• Implemented typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation risk analysis and control gap identification.</li><li>• Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment; supports bulk CSV input/output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling and risk prioritization.</li></ul>                  |
| <b>Risk Analyst</b>   <i>risk, risk prioritization, Python, Bash, Nessus, OpenVAS, NVD API, FIRST.org API</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <ul style="list-style-type: none"><li>• Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python; generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API for risk identification and control gap analysis.</li><li>• Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation for risk mitigation and policy-based risk triage.</li><li>• Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence for risk prioritization and escalation priorities.</li></ul> |

## Technical Skills

**GRC & Compliance:** NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring  
**Risk & Audit:** Risk assessment, control testing, audit documentation, vendor risk, RCSA basics  
**Fraud & AML:** Transaction monitoring, AML typologies, KYC/CDD, sanctions screening  
**Systems & Tools:** Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics  
**Frameworks:** MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
