Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent compliance routing.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling timely remediation decisions.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, supporting compliance audits and traceability.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early and reducing repeat-issue investigation time before escalation, improving detection efficiency.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK framework and generated PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators with Nmap host scans and Wireshark packet captures, assigns severity classification and logs results to Splunk.
- Translated existing detection logic into Sigma rule format, stored rules in Splunk, and performed TCP/IP analysis with Wireshark to capture SYN scans, DNS tunnelling and plaintext credential exposure evidence.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal and AbuseIPDB, retrieves WHOIS registration data and DNS records, and returns enriched threat intelligence via Telegram bot.
- Implemented Python generator that creates character-substitution variants of brand domains, queries live DNS resolution and WHOIS records to identify typosquatting domains for brand-impersonation analysis.
- Built Telegram bot in Python allowing analysts to submit URLs, processes bulk CSV inputs, enriches each entry with WHOIS and VirusTotal data, and returns OSINT profiles for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture

Automation: Python, Bash (basic), boto3, regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
