Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing consistent case routing metric.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, delivering actionable escalation report.
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, establishing a standardized documentation package.
- Detected recurring fraud patterns across 200+ weekly cases, flagging early to reduce repeat-issue investigation time before escalation, achieving a 15% time reduction.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK and generated a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators with MITRE ATT&CK context and triggers Nmap scans for host validation, outputting results to a structured JSON file.
- Translated existing detection logic into Sigma rules for vendor-neutral deployment and used Wireshark to capture TCP streams revealing SYN scans, DNS tunnelling and plaintext credential exposure, documented in a detection handbook.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, then enriches results with WHOIS registration age, DNS records and SSL certificate details, outputting a consolidated threat summary.
- Implemented Python typosquatting detector that generates character-substitution variants of target brand domains, queries live DNS resolution and WHOIS records to identify impersonating registrations, producing a daily report file.
- Created a Telegram bot in Python that accepts analyst-submitted URLs, performs bulk IOC enrichment via VirusTotal and AbuseIPDB, adds WHOIS metadata, and returns results as CSV for incident response workflows.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
