Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 - 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 - 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 - 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	Jun. 2024 - Jan. 2026 Bengaluru, India
---	---

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows, with 100% of cases escalated to senior reviewers within 24 hours.
- Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, reducing repeat-issue investigation time by 30%.
- Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions, with 99% of documentation meeting audit standards.
- Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time by 25% before escalation to senior reviewers.

Projects

SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
--	--

- Developed and deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement, and privilege escalation; mapped Tactics, Techniques, and Procedures (TTPs) to MITRE ATT&CK and wrote a PICERL incident report.
- Built an automated detection pipeline using Python, which ingests Splunk alerts, runs IOC enrichment via VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules in vendor-neutral format used by enterprise SOCs; performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.

Phishing and OSINT Threat Intelligence Tool	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
--	---

- Built a multi-API threat intelligence pipeline using Python, which submits suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS registration age, DNS records, and SSL details for phishing analysis.
- Implemented a typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis.
- Deployed a Telegram bot interface enabling analysts to submit URLs for live IOC enrichment; supports bulk CSV input/output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
