Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, supporting threat investigation pipeline, producing consistent case disposition logs.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling threat escalation process and clear decision outcomes.
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, creating a searchable threat documentation repository for future analysis.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early and reducing repeat-issue investigation time before escalation, improving threat detection rate by 15%.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection and lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK and wrote PICERL incident report.
- Built automated detection pipeline in Python that ingests Splunk alerts and runs IOC enrichment via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral use and performed TCP/IP analysis in Wireshark to detect SYN scans and DNS tunnelling and plaintext credential exposure on unencrypted sessions.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB and URLScan.io and cross-references WHOIS registration age and DNS records and SSL details for phishing analysis.
- Implemented typosquatting domain detector in Python that generates character-substitution variants of brand domains and checks live DNS resolution for brand-impersonation analysis.
- Deployed Telegram bot interface that enables analysts to submit URLs for live IOC enrichment and supports bulk CSV input and output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
