Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage, escalation, and decision workflows, establishing a standardized triage protocol
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing a detailed escalation report
- Maintained audit-ready case documentation capturing investigation findings, decisions, evidence notes, and corrective actions, creating a compliant case archive
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK in a detailed incident report.
- Built automated detection pipeline in Python that ingests Splunk alerts, enriches IOCs via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor neutral use and performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis.
- Implemented typosquatting detector that generates character-substitution variants of brand domains and checks live DNS resolution for brand impersonation analysis.
- Deployed Telegram bot interface that allows analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output and includes OSINT enrichment via theHarvester for domain profiling.
