Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, creating audit-ready evidence logs for compliance tracking.
- Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing actionable security recommendations.
- Maintained structured case records capturing investigation rationale, policy evidence, and corrective actions, producing audit-ready documentation for compliance review.
- Spotted recurring fraud patterns across 200+ weekly cases, flagging them early and cutting repeat-issue investigation time by 30% before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK, producing a correlation search library.
- Created a Python script that ingests Splunk alerts, enriches them with MITRE ATT&CK technique data and generates Nmap scan directives for severity classification, delivering an automated enrichment workflow.
- Translated detection logic into Sigma rule format and captured packet traces in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, resulting in a Sigma rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a Python pipeline that submits suspicious URLs and IPs to VirusTotal API and AbuseIPDB, then correlates WHOIS registration age and DNS records for phishing analysis, generating an enriched threat report.
- Implemented a Python typosquatting detector that generates character-substitution variants of brand domains, queries DNS resolution and WHOIS data to flag impersonation, producing a list of flagged domains.
- Deployed a Telegram bot written in Python that accepts URL submissions, performs bulk WHOIS lookups and VirusTotal scans, and returns enriched IOC data as CSV, delivering a CSV enrichment file.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
