Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying risk prioritization and SLA discipline, producing audit-ready triage logs.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, escalating findings to senior reviewers for risk management decisions, generating escalation tickets.
- Documented investigation findings, evidence notes, and corrective actions in audit-ready case files, creating control evidence for compliance tracking and decision trails.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details to produce a phishing analysis report.
- Implemented a typosquatting domain detector in Python that generates character-substitution variants of brand domains, resolves them via live DNS queries and outputs a typosquatting detection list for brand-impersonation analysis.
- Deployed a Telegram bot interface written in Python that accepts analyst-submitted URLs, enriches them with OSINT data from theHarvester and returns an enriched IOC package supporting bulk CSV input and output for incident response workflows.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API and adds EPSS context from the FIRST.org API to generate a classified CVE report.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and documents findings in a SQL injection exploit and remediation guide.
- Automated scan scheduling with Bash scripts and cron, added delta-scan logic to flag newly discovered CVEs and organized patch compliance tracking evidence in a centralized repository.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
