Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, identifying high-priority security risks and reducing repeat-issue investigation time. • Investigated root cause analysis on seller claims, uncovering policy violations and anomalous patterns that posed a significant cyber threat. • Analyzed 200+ weekly cases to detect recurring fraud patterns, flagging them early to prevent security breaches and minimize financial loss. • Documented audit-ready case findings, decisions, evidence notes, and corrective actions, maintaining a secure and transparent case management process.	

Projects

Cyber Security Part Time Internship	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Developed structured escalation logic for brute-force detection using Splunk SIEM with SPL correlation searches (index=* failed stats count by src_ip) and mapped TTPs to MITRE ATT&CK (T1110, T1078, T1059); wrote PICERL incident report for FIRST.org. • Built automated SOAR-style detection pipeline in Python ingesting Splunk alerts, enriching with VirusTotal API IOC, and dispatching Telegram notifications with CVSS severity classification. • Converted detection logic to Sigma rules and analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.	
Cyber Security Part Time Internship	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Integrated Nessus and OpenVAS REST APIs in Python to build automated vulnerability assessment pipeline, generating CVE reports with CVSS severity and EPSS context from FIRST.org API. • Developed OWASP Top 10 automated web checker to detect injection, auth, and SSRF vulnerabilities via crafted HTTP requests. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organize patch compliance (remediation tracking) tracking evidence.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
