Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow to support security incident handling, producing consistent case disposition logs.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling timely security escalation for cyber risk mitigation.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable security incident repository for future analysis.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early and reducing repeat-issue investigation time before escalation, strengthening cyber risk detection.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK and wrote PICERL incident report.
- Created Python script that ingests Splunk alerts, enriches IOCs using MITRE ATT&CK knowledge base and generates a severity classification file.
- Converted detection logic to Sigma rules and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure and documented findings in detection documentation.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi API threat intelligence pipeline that submits suspicious URLs and IPs to VirusTotal API, AbuseIPDB and URLScan.io and cross references WHOIS registration age, DNS records and SSL details for phishing analysis and produces a phishing analysis report.
- Implemented typosquatting domain detector that generates character substitution variants of brand domains and checks live DNS resolution for brand impersonation and outputs a list of impersonating domains.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflows and creates an enriched IOC dataset.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
