Work Experience

Support Operations Specialist

Jun. 2024 – Jan. 2026

Amazon FBA

Bengaluru, India

- Triageed 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows.
- Conducted root cause analysis on seller claims, identifying policy violations and anomalous patterns; escalated findings to senior reviewers.
- Maintained audit-ready case documentation, recording findings, decisions, corrective actions, and evidence notes.
- Spotted recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation.

Projects

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (T1110, T1078, T1059) and wrote incident report.
- Developed SOAR-style pipeline: Python script ingests Splunk alerts, enriches with VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.

Phishing and OSINT Threat Intelligence Tool |

Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot

- Built multi-API threat intelligence pipeline: submits suspicious data to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS, DNS, and SSL details for unified phishing probability score.
- Developed typosquatting detector generating domain variants and checking live DNS resolution to catch brand-impersonation attacks before they reach threat feeds (T1110).
- Developed Telegram bot interface for live IOC enrichment, supporting bulk CSV input/output and OSINT enrichment via theHarvester for domain profiling.
