Education

Presidency College

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

2021 – 2023

St. Claret College

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

2018 – 2021

St. Claret PU College

Higher Secondary (12th) · Bengaluru, India

2016 – 2018

Work Experience

Support Operations Specialist

Amazon FBA

Jun. 2024 – Jan. 2026

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, translating high-volume case review into structured investigation, escalation, and evidence documentation.
- Investigated seller claims, identifying policy violations and anomalous patterns, escalating findings to senior reviewers
- Maintained audit-ready documentation, recording investigation findings and evidence notes for 50+ weekly cases
- Spotted recurring fraud patterns across 200+ weekly cases and flagged repeat issues early, reducing investigation cycles before escalation.

Projects

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM for threat detection (anomaly detection) at home in India with Splunk SIEM and mapped TTPs to MITRE ATT&CK (TTP mapping), resulting in a PICERL incident report.
- Built automated SOAR (security orchestration and automation)-style detection pipeline using Python and Sigma rules (detection-as-code) to detect patterns of brute-force attacks and lateral movement.
- Performed TCP/IP analysis in Wireshark to detect SYN scans and DNS tunnelling, and documented the findings for an internshala home India project.

Vulnerability Scanner and Patch Prioritization Engine |

Python, Bash, Nessus, OpenVAS, NVD API

- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python, and generated CVE reports classified by CVSS severity (vulnerability prioritisation).
- Developed OWASP Top 10 (web application security) automated web checker that sends crafted HTTP requests to detect injection and broken auth vulnerabilities, and documented SQL injection exploit remediation.
- Automated scan scheduling via Bash and cron, and built delta-scan logic to flag newly discovered CVEs for an India internshala home project, resulting in patch compliance (remediation tracking) tracking evidence.

Technical Skills

Cyber Security: threat detection, incident response, security analysis

Automation and Threat Detection: Splunk, Python, Wireshark, Nmap, MITRE ATT&CK

Vulnerability Assessment: Nessus, OpenVAS, CVSS, EPSS

Investigation and Escalation: structured investigation, evidence documentation, decision workflows

Security Tools and Technologies: Sigma rules, VirusTotal API, Telegram bot, DNS analysis, high-volume operations review -> structured investigation, escalation, and evidence documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
