Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security review.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a traceable security evidence repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and generated a PICERL incident report.
- Created Python automation that ingests Splunk alerts, enriches indicators using MITRE ATT&CK knowledge base and logs severity classification for each alert.
- Converted detection logic to Sigma rules and performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, producing a comprehensive detection rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits suspicious URLs and IPs to VirusTotal API and AbuseIPDB, enriches the results with WHOIS registration data and delivers findings via Telegram bot output.
- Implemented Python typosquatting detector that generates character-substitution variants of brand domains, queries WHOIS records for each variant and flags live DNS resolutions in a list of suspicious domains.
- Developed Telegram bot in Python that accepts URL submissions, processes bulk CSV inputs, enriches each indicator using VirusTotal API and returns an enriched IOC report to analysts.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
