Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage, escalation and decision workflows; output: weekly triage report.
- Investigated seller claims, performed root cause analysis to identify policy violations and anomalous activity, and escalated findings to senior reviewers; output: escalation docket.
- Documented audit-ready case files capturing investigation findings, evidence notes and corrective actions for each case; output: compliant documentation repository.
- Spotted recurring fraud patterns across 200+ weekly cases, flagged them early to curb repeat issues and cut investigation time before escalation; output: pattern alert log.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK in a PICERL incident report.
- Built Python automation that ingests Splunk alerts, enriches IOCs using MITRE ATT&CK knowledge base and triggers Nmap scans for host verification, outputting results to a structured JSON file.
- Converted detection logic to Sigma rules for vendor-neutral deployment and performed packet capture analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, documenting findings in a Sigma rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, then cross-references WHOIS registration data and DNS records, outputting a consolidated threat intelligence report.
- Developed Python typosquatting detector that generates character-substitution variants of brand domains, queries WHOIS and DNS for live resolution, and logs potential impersonation entries to a CSV file.
- Deployed Telegram bot written in Python that accepts analyst-submitted URLs, performs live IOC enrichment via VirusTotal API and WHOIS lookup, and returns results as a formatted message, storing batch submissions in a CSV file.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
