Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflows, producing a daily triage summary report.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers in a formal escalation packet.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a compliant case dossier for governance reviews.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK and wrote a PICERL incident report.
- Built an automated detection pipeline where a Python script ingests Splunk alerts, enriches IOCs via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor neutral use and performed Wireshark TCP/IP analysis to detect SYN scans, DNS tunnelling and plaintext credential exposure and documented the findings in a Wireshark analysis report.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a multi-API threat intelligence pipeline that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis.
- Implemented a typosquatting domain detector that generates character substitution variants of brand domains and checks live DNS resolution for brand impersonation analysis.
- Deployed a Telegram bot interface allowing analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output and adds OSINT enrichment via theHarvester for domain profiling.
