Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage and escalation workflows, achieving consistent case-flow throughput of 48 cases/day
- Conducted root-cause analysis on seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing a daily escalation report
- Maintained audit-ready documentation of investigation findings, decisions, evidence notes and corrective actions, creating a searchable audit log for compliance reviews
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB, and URLScan.io, cross-references WHOIS registration age, DNS records, and SSL details, and generates a phishing analysis report.
- Implemented a typosquatting domain detector in Python that generates character-substitution variants of brand domains, checks live DNS resolution, and produces a brand-impersonation detection list.
- Deployed a Telegram bot interface in Python that enables analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output, and returns an enriched IOC payload for incident response workflows.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, retrieves CVE data from the NVD API, adds EPSS context from the FIRST.org API, and produces a CVSS severity classified report.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication, and SSRF vulnerabilities, documents a SQL injection exploit, and creates a remediation guide with parameterised query examples.
- Automated scan scheduling using Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence into an archive.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
