## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage and escalation workflows, producing a daily triage summary.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating an escalation dossier.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, maintaining a centralized case audit log.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK and wrote a PICERL incident report.
- Built an automated detection pipeline where a Python script ingests Splunk alerts, runs IOC enrichment via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral use and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure and documented the findings in a Wireshark analysis.

**Phishing and OSINT Threat Intelligence Tool** | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a multi-API threat intelligence pipeline that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis.
- Implemented a typosquatting domain detector that generates character-substitution variants of brand domains and checks live DNS resolution for brand-impersonation analysis.
- Deployed a Telegram bot interface enabling analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture

**Automation:** Python, Bash (basic), boto3, regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
