Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity, applying security-focused triage protocols and routing incidents to the SIEM-aligned escalation workflow, maintaining a 98% compliance rate.
- Investigated root causes of seller claims, identified policy violations and anomalous security patterns, and escalated actionable findings to senior reviewers, supporting a 15% faster case closure.
- Maintained structured case records capturing investigation rationale, policy evidence, and corrective actions, producing audit-ready documentation for compliance review.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with correlation searches for brute force, lateral movement and privilege escalation, mapped detected TTPs to MITRE ATT&CK framework and generated a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches indicators by correlating with MITRE ATT&CK tactics and outputs severity classified findings to a structured log file.
- Translated detection logic into Sigma rule format for cross SIEM use and used Wireshark packet captures to identify SYN scans, DNS tunnelling and plaintext credential leaks.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal and AbuseIPDB, enriches results with WHOIS registration data and presents findings via Telegram bot.
- Wrote Python script that generates character substitution variants of target domains, queries WHOIS records for each variant and logs potential typosquatting candidates.
- Implemented Telegram bot in Python that accepts URL submissions, performs bulk VirusTotal and AbuseIPDB lookups, returns enriched IOC data and writes results to CSV files.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
