Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage and escalation workflows, achieving consistent case triage workflow compliance.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing a daily escalation report.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, maintaining a centralized audit docket for compliance reviews.
- Spotted recurring fraud patterns across 200+ weekly cases, flagged them early and reduced repeat-issue investigation time before escalation, updating the fraud pattern register.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement, and privilege escalation and mapped TTPs to MITRE ATT&CK resulting in MITRE ATT&CK mapping.
- Created Python script that ingests Splunk alerts, enriches IOCs using MITRE ATT&CK knowledge base, and generates a severity classification report.
- Translated detection logic into Splunk SPL queries, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling, and plaintext credential exposure, and aligned findings with MITRE ATT&CK resulting in MITRE ATT&CK alignment.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits suspicious URLs and IPs to VirusTotal API and AbuseIPDB, then cross-references WHOIS registration data and DNS records for phishing analysis.
- Implemented Python typosquatting detector that generates character-substitution variants of brand domains, queries DNS resolution and WHOIS records to identify brand-impersonating domains.
- Deployed Telegram bot written in Python that accepts URL submissions, performs live IOC enrichment via VirusTotal API and AbuseIPDB, and returns results in CSV format for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
