## Education

### Presidency College

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

2021 – 2023

### St. Claret College

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

2018 – 2021

### St. Claret PU College

Higher Secondary (12th) · Bengaluru, India

2016 – 2018

## Work Experience

### Support Operations Specialist

Amazon FBA

Jun. 2024 – Jan. 2026

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured workflows.
- Investigated root cause analysis on seller claims, identifying policy violations and anomalous patterns.
- Maintained audit-ready case documentation with findings, decisions, evidence notes, and corrective actions aligned to evidence documentation and decision trails.
- Documented case findings, decisions, evidence notes, and corrective actions in audit-ready records.

## Projects

### SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL correlation (detection engineering) searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (TTP mapping) and wrote PICERL incident report.
- Built automated SOAR (security orchestration and automation)-style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment (threat intelligence) via VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules (detection-as-code) (vendor-neutral format used by enterprise SOC's); performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.

### Phishing and OSINT Threat Intelligence Tool |

Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot

- Built multi-API threat intelligence pipeline: submits suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS registration age, DNS records, and SSL details for phishing analysis.
- Implemented typosquatting (brand impersonation detection) domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment (threat intelligence); supports bulk CSV input/output for incident response workflows and includes OSINT enrichment (open-source intelligence) via theHarvester for domain profiling.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
