Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, supporting risk prioritization and SLA compliance.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling risk remediation tracking.
- Documented audit-ready case notes capturing investigation findings, evidence, decisions, and corrective actions, creating control evidence for compliance audits.
- Detected recurring fraud patterns across 200+ weekly cases, flagged early and reduced repeat-issue investigation time, improving risk detection efficiency.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis and generated a structured intelligence report.
- Implemented typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis and produced a typosquatting detection report.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment and supports bulk CSV input output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling and outputs results to a Telegram bot interface for analyst consumption.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python and generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API and stored them in a structured vulnerability database.
- Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth and SSRF vulnerabilities and documented the SQL injection exploit and parameterised query remediation in a compliance checklist.
- Automated scan scheduling via Bash and cron and built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence in a centralized audit log.
