Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured compliance tracking and escalation workflow, producing audit-ready case logs.
- Investigated seller claims to conduct root cause analysis, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating actionable compliance reports.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, establishing a control evidence repository for compliance audits.
- Spotted recurring fraud patterns across 200+ weekly cases, flagged early and reduced repeat-issue investigation time before escalation, creating a proactive risk-detection register.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis, producing an enriched threat intelligence report.
- Implemented a typosquatting domain detector in Python that generates character-substitution variants of brand domains and checks live DNS resolution for brand-impersonation analysis, delivering a list of identified typosquatting domains.
- Deployed a Telegram bot interface written in Python that enables analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflows and incorporates OSINT enrichment via theHarvester for domain profiling, resulting in a live IOC enrichment interface.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, generates CVE reports classified by CVSS severity and enriches them with EPSS context from the FIRST.org API, creating a comprehensive vulnerability report.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and documents SQL injection exploit details with parameterised query remediation, producing a detailed web security assessment.
- Automated scan scheduling using Bash and cron, implemented delta-scan logic to flag newly discovered CVEs and organized patch compliance tracking evidence, delivering a continuous patch compliance tracking record.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
