## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing a consistent case routing log.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating detailed escalation packets.
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, creating a standardized documentation repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK resulting in a PICERL incident report.
- Built automated detection pipeline: Python script ingests Splunk alerts, enriches IOCs via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral use, performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure and produced a SYN scans detection report.

**Phishing and OSINT Threat Intelligence Tool** | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline: submits suspicious URLs and IPs to VirusTotal and AbuseIPDB and cross-references WHOIS registration age, DNS records and SSL details for phishing analysis resulting in a phishing analysis report.
- Implemented typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution using WHOIS data for brand-impersonation analysis producing a brand-impersonation detection list.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflows and generates incident response workflow files.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
